EXPERIENCE

SYSTEMS Limited — Cloud App Dev Intern

July 2026 – Present

Developing RESTful APIs using FastAPI and implementing CRUD operations for scalable backend applications. Working with MongoDB Atlas to design databases, manage collections, and integrate data persistence with APIs.

PSEB APPRENTICESHIP (NEXURA TECH) — Frontend Dev Intern

Jan 2026 – June 2026

Worked as a Frontend Web Developer Intern, developing responsive and user-friendly web applications using Next.js, React.js, TailwindCSS and JavaScript. Collaborated on multiple projects to build reusable UI components, implement responsive designs, and enhance user experience.

I TECH SOLUTION — Intern

July 2025 – Sep 2025

Assisted in front-end UI design by applying HTML, CSS, and JavaScript to create responsive, interactive templates and collaborated with the team during development.

PROJECTS

Personal Portfolio — Project

Developed a fully responsive personal portfolio using React.js and Tailwind CSS to effectively showcase my projects, skills, and experience. The portfolio features a modern UI, optimized performance, and user-friendly navigation. View the complete project on my GitHub via the link provided.

SKILLS

Frontend Development

- React.js
- Next.js
- Tailwind CSS
- TypeScript
- HTML5, CSS3
- JavaScript (ES6+)
- Component-Based Architecture
- Responsive Web Design

State Management

- Redux Toolkit (RTK)
- RTK Query
- Zustand

API Integration & Data Fetching

- Fetch API
- Axios
- API Data Fetching & Handling

Forms and Validation

- React Hook Form
- Zod
- Yup
- Form Validation & Error Handling

Backend Development

- Python
- FastAPI
- CRUD API Development
- MongoDB Atlas

Veloura Website (Frontend) — Project

Designed and developed the frontend of the Veloura website using React.js and Tailwind CSS. Implemented fully responsive layouts and reusable components to ensure scalability and consistency. Enhanced user experience through interactive UI elements, clean design, and smooth navigation across multiple devices. View the complete project on my GitHub via the link provided.

User Dashboard — Project

Designed and developed a dynamic user dashboard using React.js and Tailwind CSS. Implemented responsive layouts and reusable UI components to ensure scalability and consistency across the application. Utilized React state management and JavaScript-based form validation methods (including regex patterns and conditional checks) to handle user inputs efficiently and improve data accuracy. This project is currently in progress, with continuous improvements and feature enhancements being implemented. . View the complete project on my GitHub via the link provided.

Sentiment Analysis-Based Well-being Meter — FYP

An AI-based system designed to analyze textual data using Natural language processing and machine learning models, including LSTM and hybrid SVM + Logistic Regression. The system classifies user sentiment (positive, negative, or neutral) and estimates overall well-being levels. It processes user input text to extract meaningful patterns and provides insights through prediction results and evaluation metrics, helping to assess emotional and mental state trends.
